PERSONAL PROFILE

Hi, I'm Hari, a student at KGISL Institute of Technology in Coimbatore. I love learning new things and solving problems. I've been studying here for a while, and during my time, I've been eager to learn and grow. In my first year, I learned Python and C, and in my second year, I started exploring Python, C, Flutter, Java, and React, and participated in hackathons to address real-world challenges. I am always eager to grow my skills and deepen my understanding of technology.

EDUCATION

B.Tech Information Technology (Honors)

Coimbatore, Tamil Nadu
November 2022 - Current

KGISL Institute of Technology

- Graduated with Distinction
- Selected for Industrial Visit among the top of the class

Kamaraj Higher Secondary School

Kovilpatti, Tamil Nadu

SKILLS

C, Java, Dart, Flutter, React, Firebase, Supabase, opencv, Flask, API integration, Flutter Riverpod, Bloc, Responsive design

PROJECTS

[Orchid App](#) - Available on PlayStore

Nov 2024

- Orchid is more than just an app—it's a companion for mental well-being, designed to support individuals facing stress, anxiety, and emotional challenges. Backed by expert insights from psychologists
- Integrated data management with firebase.

ClassWix App

Feb 2025

- Developed during my internship, ClassWiX is a mobile application designed to connect teachers and students seamlessly.
- Implemented robust data management using PostgreSQL to ensure efficient storage and retrieval of information.

[Bike Booking App](#)

Jan 2025

- This app allows users to easily book bikes on the go, providing a seamless and responsive experience across different devices

Music App:

Oct 2023

- Developed a music app called "Feel It" using Flutter.
- Focused on enhancing the user experience with a sleek and intuitive UI

Issue Tracking System:

Oct 2023

- Developed an app to track various issues in college, such as hostel issues, subject issues, canteen issues, and restroom issues.
- Integrated data management with Supabase. Users can file complaints on this app.

StudentPortfolio:

Dec 2024

- An app designed for college placements, featuring students' personal details, rank holders, GPAs, and CGPAs for streamlined access and evaluation.

Gate Surveillance Object Classification using OpenCV and YOLO on Raspberry Pi:

Sep 2024

- Developed a gateway detection system using Convolutional Neural Networks (CNNs) to enhance campus security and monitoring.
